Windows Media Player still is available in Windows 10, but Microsoft removes from PCs running Windows 8 Pro.. I understand that Windows 10 will deprecate Windows Media Center Microsoft's FAQ mentions providing DVD playback software, but that's not really an issue for me.. It means that Windows 10 does not support playing back DVDs and so on So mostly you need to find out a better alternative to Windows Media Player for Windows 10 that is more functional and up-to-date, to address Windows 10 Media Player DVD playback issue and much more.
